

August 13 & 14, 2023 based on the discussions before the Customs Management Symposium, information from the ASYCUDA Database, policy instructions from the Ministry of Finance, suggestions from the Customs Offices, pre-seminar preparatory discussions, and recommendations from internal agencies to increase the value of existing information in August 2023. Information price list of goods to be imported from the proposed third country:

(This database (informative price list) is not the final price list for the goods imported for customs purposes, but only the information price. Therefore, when the offices determine the transaction price, the transaction price is determined from the documents submitted by the importer, the maximum retail price or information price evidence obtained through other means. If it is not possible, the database will be used to determine the transaction value according to the Customs Act 2008.

For internal purpose only

S.N.	CHAPTER	Harmonised Code	Name of the Goods	Description of Goods (Types, Charecteristics, Model, Brand & Art No.)	Unit	Currency	Unit price (CIF)	Country of Origin
